Electric Hotplate/Grill

Energy Efficient | High Performance | Longevity | Easy to Clean

The Austheat 3 phase electric hotplate griller is the ideal solution for busy fast food outlets where high speed grilling and toasting is required. Ideal as a hamburger or grill station, the Austheat hotplate/griller is designed to work either as a stand alone machine or alongside Austheat deep fryers in a modular configuration.

AHT860

AH860

FEATURES

AHT860 with toasting / salamander function

- Ideal for high speed grilling and toasting of foods, such as hamburgers, steak and eggs
- Individual control for left & right cooking zones with separate Cook/Idle (standby) functionality
- The toaster has a dedicated element for perfect one-sided toasting / salamander function
- The toaster also has a Cook/Idle (i.e. standby) setting for quick switching between high and low settings

AH860 - with extra storage space:

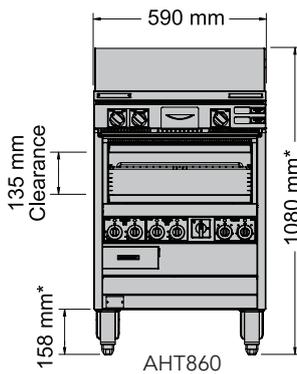

- The extra storage space under the steel hotplate is ideal for storing plates, pans or cooking materials. The perfect storage size for 1/1 gastronorm pans.
- Removable shelf for easy cleaning – 3 step adjustment

Features of both AHT860 and AH860:

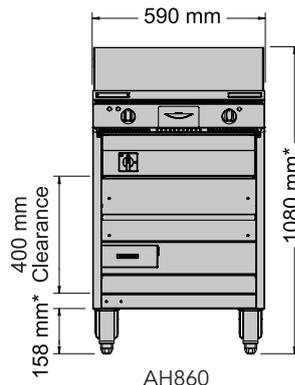

- 3 phase electric hotplate / griddle toaster
- 12 mm thick heavy-duty machined steel hotplate
- Easily readable twin digital temperature displays
- Castors on the rear and adjustable legs at the front.
