

Hands-Free (HF) Urn Tap Lever Accessory

Since COVID-19, Robatherm Hot Water Urns have been in great demand. With COVID-19 contact minimisation considerations in mind, Roband has designed an accessory to suit our range of Robatherm Hot Water Urns and Percolator, that enables the units to be operated without the need to touch the dispenser.

The Urn Tap Lever slides over the hand operated lever and is secured in place. When a cup is placed against the Lever, the Urn/Percolator automatically dispenses liquid allowing hands free operation. The lever is manufactured from high quality and durable stainless steel.

Model Number: HF1

Description: Hands-Free Urn Tap Lever to suit all Robatherm Urns/Percolator
